Career Summary:

While my career has expanded over two decades as a print and web designer with UX and UI experience, my career path has expanded into a full-stack developer.

Technical Summary:

CSS3	React	Express	Photoshop
HTML5	Redux	Bootstrap	InDesign
JavaScript (ES6)	Node.js	RESTful APIs	Illustrator
	MongoDB	NPM	

Projects Developed:

DevConnector App: Live | Github

- Built a backend API with NodeJS and Express
- Created protected routes/end-points with JWT (jsonwebtoken)
- Built the frontend with React to work with the API
- Implemented Redux for state management
- Created a build script, securing keys and deployed to Heroku using Git

Personal Portfolio Live | Github

- Set up React-app
- Took exisitng html files and / converted to React components
- Updated existing data with personal data
- Created submission form for inquiries
- Created a build script and deployed to Github pages

Client Experience:

D-Link	Toyota	Museum Tower Dallas	U.S. Dept. of State
Epson	So. Cal. Edison	Marriott - AC Hotels	Malaysia Airlines
ViewSonic	Northrop Grumman	DoubleTree Hotels	
Seiko Instruments	Aquarium of the Pacific	Pimco	

Externship:

FundEDU, Costa Mesa, CA

Freelance Full Stack Developer – Aug. 2019

Task: Developed a web application connecting students with funders.

Responsibility:

- Set up server with Node.js and Express
- Created MongoDB schema for registration and login purposes
- Set up API routes using passport + jsonwebtokens (JWTs) for authentication and input validation
- Created protected routes accessible only to logged-in users based on their authentication.
- Created front-end React app with components for navigation, landing page, login, registration and dashboard.
- Implemented Redux for state management

Employment:

Abert Entity, Palm Springs, CA
Freelance Web Designer – February 2018 – May 2019

Task: Develop a web site for new business presentations.
Responsibility: Set up a website using Adobe Muse. Created a fully functional website that was easily interchangeable to meet the needs of the presenter. The main company portions of the site were static across four templates, and the products sections were changed out to meet the specific client who was being presented.

Pacific Hospitality Group, Irvine, CA
Graphic Designer – Oct. 2015 – Feb. 2019
Responsibility: Designed all materials to support the marketing initiatives and overall brand identities of Pacific Hospitality Group's Meritage Collection of hotels
- Lead the creative support for hotels, restaurants, spas and ancillary revenue sources via print and digital means
- Assisted with design and development of UI/UX interface

Bowman Design Group, Signal Hill, CA
Web Design/Production Artist – Feb. 2014 – Oct. 2015
Responsibility:
- Designed and produced print materials including print advertising, exhibit displays, museums events, and large format graphics for various clients, including Southern California Edison, Aquarium of the Pacific, Folsom Powerhouse State Historic Park
- Developed company website and interactive displays for Google, San Francisco headquarters, using Muse & Edge Animate

Military Service:

United States Marine Corps, Veteran
Rank: Corporal
Honorable Discharge

Continuing Education:

Redwood Code Academy, Costa Mesa, CA
- Extending career into a full-stack (MERN) web developer with an emphasis on React and Redux
